

Reproducible Analytical Pipelines - Example report

Test report

In-text numbers

Out total amount of product produced is 426000 units at a price of £426000.

Adding a table

Table 1: Negotiation details

Customer	Project length (days)	Quantity	Price (GBP)
Global Media	4	19500	19500
salesforce.com	12	20000	20000
salesforce.com	52	22500	22500
Acme	67	22500	22500

The information on our current contracts at the negotiation stage are shown in [Table 1](#).

Adding a plot

The number of projects for each customer are shown in [Figure 1](#). The customer with the greatest number of projects is Acme. We currently have 5 projects with them.

The relationship between the length of a project and the price of the project is given in [Figure 2](#). The average project length is 23.5 (standard deviation = 20.7) and the average project price is 35500 (standard deviation = 20.7).
